SUMMARY

A Full stack developer with practical experience in React.js, Firebase, and AWS Cloud through internships and independently built projects. Consistently delivers production-ready features on schedule, having a strong foundation in Java, Spring, and modern full-stack development standards.

EDUCATION

Jawahar Institute of Technology, Management and Research, Nashik B.E. in Information Technology Engineering, Savitribai Phule Pune University • CGPA: 8.26	Completed 2022–2026
Bhonsala Military College, Nashik HSC, Maharashtra State Board	Completed March 2022

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, HTML5, CSS3, C
Backend: Spring Boot, Spring Web MVC, Servlets, JDBC, REST API
Frontend: React.js, Tailwind CSS, TypeScript
Database: Firebase Firestore, Firebase Realtime DB, MySQL
Cloud & Tools: AWS EC2, VPC, S3, IAM, Git, GitHub
Core Skills: Problem Solving, Teamwork, Communication, Leadership

EXPERIENCE

Software Engineer, Motwane Digital Nashik, Maharashtra (On-site)	Aug 2026 – Present
- Developed interactive React.js dashboards for real-time data visualization of industrial asset metrics, including trend charts, health indicators, and performance analytics. - Collaborated with cross-functional teams to improve UI responsiveness and data readability, enhancing overall user experience for field engineers and monitoring operators.	
Intern, Motwane Digital Nashik, Maharashtra (On-site)	June 2026 – Aug 2026
- Built reusable React.js chart components to display time-series sensor data, enabling stakeholders to track asset health trends across configurable time ranges. - Assisted in designing responsive frontend layouts for cloud-connected monitoring interfaces, ensuring consistent performance across desktop and tablet viewports.	
Cloud Computing Trainee, Sumago Infotech Nashik, Maharashtra (On-site)	Aug 2025 – Oct 2025
- Architected AWS infrastructure (EC2, VPC) with least-privilege IAM policies, cutting provisioning time by 40 - Deployed a Spring Boot backend on secure EC2 instances using custom VPC networking and SSH to validate real-world production readiness.	
Java Full Stack Intern, Softcrowd Technologies Nashik, Maharashtra (On-site)	Dec 2024 – Jan 2025
Built full-featured social media application in React.js achieving 30% improvement in data retrieval speed through optimized component architecture and efficient state management	

PROJECTS

FenceTrack - Smart Geofence and Real-Time GPS Tracking System ESP32 Microcontroller, React.js, Firebase Realtime Database, Google Maps API	Nov 2025 – Jan 2026
Built real-time GPS system with 1-second map refresh via Google Maps API and Firebase backend handling daily location records with geofence alerting and hardware-level transmission	
Cognito AI Chat - Multi-User AI Chat Platform React.js (Vite), Firebase Firestore, Firebase Auth, Google Gemini API, Tailwind CSS	Jul 2025 – Oct 2025
Architected a secure multi-user platform supporting 100+ concurrent sessions, maintaining 99.9% data consistency with strict data isolation and reducing user friction by 25
